PROFESSIONAL SUMMARY

Seeking a Summer 2027 Software Engineering internship or full time position to apply full-stack development skills and expand expertise in scalable web applications and data driven solutions.

EDUCATION

Iowa State University, College of Engineering

- Expected graduation date 05/2027

Bachelor of Science - Software Engineering

- 2.91 GPA
- Dean's List: Spring 2026 (3.73 GPA)

Applied Artificial Intelligence Minor

Artificial Intelligence Minor

SKILLS

INDUSTRY KNOWLEDGE -

- Project Management
- Design Thinking
- Technical Writing

TECHNICAL-

- Languages:** Python, Java, C, JavaScript, HTML, CSS
- Frameworks & Tools:** React, Node.js, MySQL, MongoDB, Git, Android Studio, VS Code

INTERPERSONAL -

- Team Leadership
- Problem Solving
- Collaboration

PROJECTS

GYM & TRAINER TRACKING APP

- Built a full-feature fitness application in android studio for tracking meals, workouts, and daily calorie intake
- Implemented user authentication to save progress and personalize goals
- Created goal-setting system, workout plans, and progress monitoring dashboard

ASCII DUNGEON SURVIVAL GAME

- Developed a terminal-based dungeon crawler entirely in ASCII graphics using C
- Implemented an inventory system for picking up, dropping, and using items for healing and defense
- Created monster combat mechanics, fog-of-war exploration mode, teleportation, and multi-level maps

NHL DRAFT SIMULATION GAME

- Developed an interactive Python-based NHL career simulation game featuring drafting, team dynamics, and in-game decision making
- Implemented a probability-based scoring system influencing shot success and game outcomes
- Built a dialogue and interview system where user responses impacted draft position and team relationships

PROFESSIONAL EXPERIENCE

IT SUPPORT INTERN- 05/26-08/26

IIT-SOURCETECH - LISLE & HARVEY, ILLINOIS

- Configured and managed wireless access points to support office network connectivity
- Assisted with troubleshooting device, account, and connectivity issues for employees
- Built PCs as well as set up and configured computers and accounts for new employees during the onboarding process
- Shadowed senior IT professionals to learn PC hardware, network infrastructure, and daily IT operations

SOFTWARE DEVELOPER INTERN - 05/25-08/25

IIT-SOURCETECH - REMOTE

- Learned and applied workflow practices using task boards, branches, code reviews, and CI/CD pipelines
- Created feature branches, implemented changes, merged pull requests, and monitored automated pipelines
- Wrote and executed tests to validate functionality and prevent regressions
- Shadowed senior developers to understand company architecture, deployment flow, and daily engineering operations

CO-LEAD DEVELOPER - 01/25-PRESENT

DESI EATS - WELLESLEY, MASSACHUSETTS

- Developed core backend functionality and page navigation for Desi Eats' production website
- Built an interactive meal customization system allowing users to select ingredients and adjust quantities dynamically
- Implemented calorie tracking display and menu data flow
- Contributed to a platform receiving hundreds of monthly visits and ranking #1 on Google for "Desi Eats"
